

Boris wonders as he walks...

Is the difference between 5 and 11 more or less than the difference between 11 and 18?

Boris heads for home at 3.30pm. It will take him 40 minutes to walk home along the path. He needs to hurry up!

He says,

'I can take the short cut through the trees, which will halve my time.'

Boris takes the short cut, but falls over a branch hurting his knee. By the time he has rubbed his knee better and is ready to carry on, 6 minutes have passed. He walks on, getting home safely.

At what time does Boris finally get home?

Intended Learning:

- Solve simple word problems that involve addition and subtraction.
- Use subtraction in 'take away' and 'find the difference' problems.
- Find $\frac{1}{2}$, $\frac{1}{4}$ and $\frac{3}{4}$ of a shape or quantity.
- Add and subtract numbers mentally including a 2-digit number and ones and a 2-digit number and tens.
